

clearing the air about

vaping

Tuesday, October 9, 2018
@ 6:30 pm

Indian Valley Middle School
130 Maple Avenue, Harleysville, PA 19438

Kids are wired to try new things. The current trend, both nationally and locally, is vaping. Along with other risky behaviors, this is something we need to have a conversation about, as parents and as a community that cares.

- We'll discuss ways we can help kids to break away from cultural pressures.
- The teenage brain is built to take risks. How can we encourage smart choices?
- Vaping can involve flavored liquids, nicotine, or cannabis. We'll learn about the implications of each.

We'll be joined by Patrick Dowling, LPC, a licensed clinician who works with adolescents and young adults. We will also be joined by a prevention specialist from Caron Treatment Center.
